INFORMATION THEORY AND CODING THEORY

Output-Uniform Universal Coding of Discrete Memoryless Sources - Yu. M. Shtar'kov 1 3

Bounds on E-Capacity of a Channel with a Random Parameter - M. E. Arutyunyan [Haroutunian] 10 14

Weight Distributions of Subfield Subcodes of Algebraic-Geometrical Codes - S. G. Vlăduts and A. N. Skorobogatov 19 24

Signal-Code Constructions without Zero Spectral Component - V. V. Zyablov and S. L. Portnoi 30 37

Sequential Decoding Algorithm Producing the Maximum-Likelihood Estimate for Low-Density Gallager Codes - V. B. Balakirskii 40 50

SIGNAL PROCESSING METHODS

Detection of a Signal with Unknown Moments of Appearance and Disappearance - V. G. Repin 49 61

Hypotheses Testing with Incompletely Known Distribution Function of the Observations and Unknown A Priori Probabilities of the Hypotheses - A. A. Slepokurov 58 73

Demodulation of Discrete-Frequency Signals in a Multipath Channel - D. R. Ankudinov and Yu. S. Shinakov 67 84

Optimal Rates of Convergence of Estimates in the Stochastic Problem of Computerized Tomography - A. P. Korostelev and A. B. Tsybakov 73 92

BRIEF COMMUNICATIONS

Data Compression in Remote Sounding - V. P. Yakovlev 82 104

Volume 27, Number 2, April-June, 1991

LARGE SYSTEMS

Breakdown of Conservation Laws in Stochastic Cellular Automata - V. A. Malyshev 87 3

COMMUNICATION NETWORK THEORY

Ergodicity of Partially Accessible Multichannel Communication Systems - S. G. Foss and N. I. Chernova 94 9

Comparative Throughput Analysis of Queueing Networks with Exponential and Deterministic Service Times in the Nodes - A. L. Stolyar 99 15

Stack Algorithm in a Broadcast Channel with Capture - N. D. Vvedenskaya and B. S. Tsybakov 107 25

SIGNAL PROCESSING METHODS

Nonlinear Confidence Estimation of Signal Parameters - A. V. Timofeev 117 35

Optimal Zonal Coding of Digital Signals Using Transforms - A. A. Petrosyan 128 46

Parameter Estimation of ARMA Processes - E. G. Zhilyakov 140 59

Trispectral Analysis of Stationary Stochastic Processes: Large-Sample Case - V. G. Alekseev 150 69

	Engl.	Russ.
CODING THEORY		
Convolutional Codes for Channels with Fading - A. N. Trofimov	155	75
Weight Enumerators of High-Rate Convolutional Codes Based on the Hamming Code - I. E. Bocharova	166	86
BRIEF COMMUNICATIONS		
Sequential Syndrome Decoding of Convolutional Codes over Large Alphabets - D. K. Zigangirov and K. Sh. Zigangirov	172	92
Reception of Convolutional Codes in a Channel with Intersymbol Interference - D. D. Klovskii, V. G. Kartashevskii, and S. A. Belous	176	97
Comparative Analysis of Sequential Decoding Algorithms - A. A. Bezruk, D. K. Zigangirov, and S. A. Popov	179	100
Fast Computation of Multidimensional DFT - M. Ya. Kel'bert and A. E. Mazel'	185	107

Volume 27, Number 3, July-September, 1991

INFORMATION THEORY AND CODING THEORY		
Construction of Partial Unit Memory Convolutional Codes based on Reed-Muller Codes - V. V. Zyablov and S. L. Portnoi	189	3
Existence of Fixed Convolutional Codes of Rate 2/c for $c \geq 4$ that Achieve the Costello Bound - K. Sh. Zigangirov and V. V. Chepyzhov	199	16
List Decoding in a Gaussian Channel - B. D. Kudryashov	211	30
SIGNAL PROCESSING METHODS		
Testing of Multialternative Hypotheses under A Priori Uncertainty - V. G. Repin, G. P. Tartakovskii, and A. A. Slepokurov	219	39
Game-Theoretical Problems of Synthesis of Signal Generation and Reception Algorithms - A. M. Chudnov	233	57
Estimation of Distance Functionals between Density Functions - G. M. Koshkin	241	66
COMMUNICATION NETWORK THEORY		
Lower Bound on Delay in a Random Multiple Access System - B. S. Tsybakov and N. B. Likhanov	247	73
BRIEF COMMUNICATIONS		
Asymptotic Bit Error Probability for Convolutional Codes - Yu. P. Lobanov	261	89
Limit Theorems for Queueing Networks with Multichannel Stations - M. M. Safarov	266	95
Using Group Properties of Discrete and Continuous Filtering Algorithms for Complex Systems of Observers - V. V. Khutortsev	271	102

Volume 27, Number 4, October-December, 1991

INFORMATION THEORY		
Simple Methods for Deriving Lower Bounds in the Theory of Codes - L. A. Bassalygo, S. I. Gel'fand, and M. S. Pinsker	277	3
Relative-Redundancy Universal Coding of Memoryless Sources - Yu. M. Shtar'kov	282	9
Lower Bound on Error Probability in Fixed-Volume List Decoding - V. M. Blinovskii	288	17
CODING THEORY		
Concatenation Method for Construction of Spherical Codes in n-Dimensional Euclidean Space - S. M. Dodunekov, V. A. Zinov'ev, and T. Érikson	303	34

	Engl.	Russ.
Fast Maximum-Likelihood Decoding of Reed–Muller Codes - V. V. Zyablov and S. L. Portnoi	307	39
Decoding of Low-Density Codes - S. I. Kovalev	317	51
SIGNAL PROCESSING METHODS		
Some Interpolation Procedures for a Partially Observed Markov Process - B. V. Lazareva	322	57
Nonstationarity Test for a Gaussian Time-Series Autoregressive Model with Close Null and Alternative Hypotheses - J. Kormos and V. I. Piterbarg	334	70
Fast Evaluation of Transcendental Functions - E. A. Karatsuba	339	76
BRIEF COMMUNICATIONS		
Asymptotic Behavior of Nonanticipative Epsilon-Entropy for Gaussian Processes - A. K. Gorbunov and M. S. Pinsker	361	100
Distortion-free Compression of Telephone Signals in Multichannel Communication Lines - V. R. Zvonkovich, I. V. Pertsev, B. Ya. Ryabko, and I. V. Sitnyakovskii	366	105
